

Report concerning area of Open Space at Mead Close

The Parish Council owns and is responsible for the area of public open space at the bottom of Mead Close. Restrictive covenants are in place to ensure the land remains as public open space.

Although the grass is cut regularly as part of the Parish Council's grass-cutting contract, the land has not been properly maintained for several years and requires some attention. A small amount of rubbish has appeared; the trees are overgrown and children playing near the stream have created a large hole in the ground.

There have also been concerns about vehicles being parked on the land and driven across it to access neighbouring land. There does not appear to be any current activity of this nature.

To discuss ideas for improving and maintaining the area.

Photos below on the current condition.
